# STYLED STEEL WHEELS

## INSTALLATION GUIDE

**APPLICATION: 1964-68 Stock & Custom Sizes**

C5ZZ-1007-A, C5ZZ-1007-ARG, C6ZZ-1007-A, C7ZZ-1007-A, C5ZZ-1007-B, C5ZZ-1007-C, C5ZZ-1007-D

Thank you for buying Scott Drake styled steel wheels. Scott Drake has gone to great lengths to insure that highest degree of workmanship and quality materials are used to manufacture our styled steel wheels. Our extra attention to detail, improved design, and use of modern assembly techniques, insures an exact reproduction of the original, right down to the simulated center rivets. Please **READ** and carefully follow the mounting and balancing instructions so you may enjoy years of service from the best reproduction parts in the industry.

### WARNING: TIRE CLEARANCE

Early Mustangs were originally designed for, and equipped with, 14" x 5" rims and approximately "195-70-14" tires. If purchasing larger than stock rims and tires, use extreme caution when selecting tires. Oversized tires can interfere with wheel-well clearance and can damage tires or the car body. On wider tires, always check clearance between the backside of front tires and upper control arm. The upper control arm could cut into the oversized tire and cause tire failure, resulting in loss of vehicle control.

### BALANCING INSTRUCTIONS:

All styled steel wheels should be "Lug Centric" balanced. This balances the wheel by using 5 lug holes, and is the most accurate form of balancing. This method is balancing the wheel and tire exactly as it will be mounted on the vehicle. Cone balancing is the most common method of balancing and some smaller tire shops may not offer "Lug Centric" balancing. Cone balancing assumes that the small hubcap hole and the large backing plate hole are both on true center of the wheel. We have gone to great lengths to try and align both holes on true center and our wheels will balance using the "Cone Balancing" process. Occasionally you may find a rim that will not balance using a cone balancer. DO NOT return rim to the supplier, it is not defective. Request that it should be "Lug Centric" balanced. All rims have been tested for trueness and will balance on a lug-centric balancer. We do not recommend cone balancing. However, if you choose to have your wheels cone balanced, most will balance to acceptable tolerances. If you are unable to balance rim on a "Lug Centric" balancer, return it to Scott Drake and we will repair or replace it at no charge. (All returns must be accompanied with official paperwork from the tire shop stating that they could not balance rim using a "Lug Centric" balancer.)

### WARRANTY INFORMATION:

Scott Drake Styled Steel Wheels are warranted for 1 year from the date of purchase (up to a maximum of 15 months from the date of manufacture). Warranty covers defects in chrome and workmanship. Warranty does not cover damage due to abuse, neglect, curb side scrapes and acid stains (including animal urine). If manufacturer determines wheel is not repairable, the wheel will be replaced. Warranty only covers repair of defective wheel, and does not cover shipping, installation or labor charges.

*\* Please call Scott Drake Customer Service for a Return Authorization (RA) before returning any product. Proof of purchase and dated receipt must be present with any return. All returned products are tested and if found to be damaged by the installer, no replacement will be issued. You pay the cost to ship to us, we pay for the return shipping. Guarantee does not include any labor and/or tax charges incurred.*
